Decorative and Ornamental Ferns

The Beautiful Ostrich Plume Fern (Elegantissima Compacta)

This new variety is so far ahead of the Boston Fern that there is positively no comparison to be made. The fronds grow very broad and heavy, often measuring six inches or more across, and five or six feet long. The plant assumes an exceedingly massive yet graceful appearance. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly.

It is wonderfully valuable, not only on account of its beauty, but also on account of its easy culture, hardiness and general adaptability. It has all the free-flowering, hardy characteristics of the Boston Fern, and, like that plant, is especially suitable for the home culture and a much more beautiful plant for greenhouse and conservatory decoration.

The McGregor Bros. Co., Springfield, Ohio, U. S. A.—Received Ferns today. I have dealt with every reputable Florist in the United States, but I have never received such splendid, large, thrifty plants packed in such excellent shape. Mrs. W. H. Townsend, Azusa, California.

We offer well established plants at 20 cents each; three for 50 cents, postpaid; strong plants, 30 cents each; 3 for 80 cents, postpaid. Extra strong plants, 50 cents each; three for $1.25. (The largest sizes of these Decorative Ferns should be sent by express.)

The Grand New Dwarf Fern, "Teddy Junior"

A sport from the famous Roosevelt Fern. Fronds are of the Ostrich Plume type; broad and beautiful, and droop just enough to make a graceful plant. This variety produces four times more fronds than any other Fern ever introduced, and makes an unusually attractive pot plant. **Price, nice plants, 20 cents each; larger plants, 50 cents.**

Scholzelii

The ideal Plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae sub-divided, giving it an airy, feathery appearance.

Price, nicely shaped plants, 15 cents; larger sizes, 30 and 50 cents, postpaid.

Roosevelt

In general characteristics it resembles the Boston Fern, but with two points of excellence over that variety. First, it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended. **Fine young plants, 20 cents and 35 cents each; stronger plants, 50 cents, postpaid.**

The Parlor Fern Scotti

(Scotti)—It is a condensed form of the Boston Fern with characteristics not evident in the parent. The fronds average about 20 inches and 3 inches in width at the widest point. **Price, nice young plants, 15c each; larger size, 25c.**

The Beautiful Ostrich Plume Fern

The Boston Fern

This popular Fern has proven a most valuable decorative plant. It is rapid growing, of very easy culture, soon forming a large, graceful plant; its beautiful fronds often attain a height of 5 to 6 feet, which arch and droop gracefully. No plant ever introduced has been more popular than the "Boston Fern." **Price, nice young plants, 15 cents each; larger plants, 25 cents and 50 cents each, postpaid.**

Whitmanii

The Whitmanii is of dwarf growth and wide upright, stock shape. The finely cut, fluffy fronds stand erect. Each frond or branch has a double row of perfect little fronds set at right angles to the midrib. They are graceful beyond description, feathery, plumy; nothing describes them better than "Ostrich Plumes." **Price, 15c each, postpaid; larger plants, 25c and 35c each, postpaid; stronger plants, 50c.**

FOR FERN DISH AND TABLE DECORATION

Onychium Japonicum

Has long, graceful fronds. The wiry texture of the leaf makes it keep for a long time. Very useful to cut for vases. **Price, 15 cents each, 2 for 25 cents, postpaid.**

Shaking Fern

(Pteris Tremula)—The foliage of the Pteris varieties is large and very graceful. The slightest movement of the air shakes the leaves of the Tremula, which we recommend more than any other for house culture. It grows readily and very fast. Keep the leaves from dust and sprinkle slightly every warm day. **Price, 15 cents each, 3 for 40 cents, postpaid; larger size, 25 cts. each.**

Moss Fern

(Selaginella Emilliana) — A new, upright growing moss, with numerous feathery stems branching from the base and forming a dense tuft. **Price, 15 cents each; 2 for 25 cents.**

Crested Silver Fern

(Pteris Cretica Mayii)

A crested form of Pteris Cretica Albo-Lineata, showing the same variegations as that variety, but of dwarf habit. **Price, 15c each; 3 for 40c.**

Silver Fern

(Pteris Argyrea.)—A very showy Fern with variegated foliage; fronds large, light green, with broad band of silver-white down the center. **20c each; 3 for 50c, postpaid.**

Crowfoot Fern

(Pteris Wilsonii)

Dwarf, deep green foliage, leaves heavily crested. A fine addition. **Price, 15 cents each, 3 for 40 cents, postpaid.**

FERNS FOR FERN DISHES

Special Offer For a Fern Dish five to six inches in diameter we will send you six Ferns, all different, our selection of varieties, the kinds most suitable for this purpose, for **50 cents postpaid**; for a Fern Dish six to seven inches in diameter, we will send nine Ferns for **75 cents, postpaid**; for Fern Dish 7 to 9 inches in diameter we will send 12 Ferns all different, our selection, for **$1.00, 6 for 50 cents, postpaid; 9 for 75 cents, postpaid; 12 for $1.00, postpaid.**

Crested Fern

(Pteris Wimsetti.)—A very pretty and useful Fern for specimen or dish. Green leaves with ends very peculiarly crested. Short, compact grower, and will stand rough treatment. **Price, 15 cents each, 3 for 40 cents.**

The Popular Maiden Hair Fern

(Adiantum Cuneatum) — Forms long, graceful fronds, with the ends of the fronds developed into bunching, tasseled heads. **Price, 15 cents each; 3 for 40 cents.**

Crested Holly Fern

CYRTOMIUM ROCHFORDIANUM—The most valuable Decorative Fern of recent introduction. Its foliage is of a rich, deep, glossy green color, the pinnae or leaflets besides being wavy or undulated are also deeply cut or toothed, giving the plant a graceful, light appearance. **Price 15 cents; 3 for 40 cents.**

Aspidium Tsussimense

Of strong but dwarf and graceful habit; of good color and of better keeping quality than any other Fern we know. A good grower and very ornamental. **Price, 15 cents each, 3 for 25 cents; larger size, 25 cents each, postpaid.**

The Importance of Fall Planting

While the long winter season brings some delights of its own, greatest among them is that touch of summer time, which comes with the indoor garden; the blooming of the Dutch bulbs and the wealth of the foliage and flowers in our sunny windows. All of our homes offer some ideal positions exposed to sunshine throughout or during most of the day, and by exercising a little ingenuity and foresight it is possible, with a little work, to have a long succession of flowering plants growing from bulbs.

New Single and Double Narcissus, see pages 12 and 13.

Flowers like these can only be had by Fall Planting.

Hyacinths, Tulips and Narcissus, together with others in countless variety, are ready in the early fall to plant indoors and out, and early, not late, if we want the best blooms. In the bulbous plants, which really grow of themselves, we find much genuine satisfaction. The ease with which they are grown gives them a peculiar charm, and all become popular with flower-loving people.

An interchange of garden experiences would probably furnish the best proofs of the advantages of fall planting. The flowering bulbs of January are only brought about through the work of the fall months previous; so it is with outdoor plants, the stately Perennials, the Delphiniums, the Phlox and Peonies, etc. The Iris of your neighbor which bloomed with the advent of spring and when you were still studying the catalog, were carefully set away in the fall, and small as the plants may have been, were found in the spring to break out of the earth with the Narcissus and Tulips and long before the ground had opened itself to the spade and the hoe. And with the Iris came the balance of the hardy garden, blazing out in March and April with a wealth of foliage and flowers—all the reward of a little work in the fall before.

The importance of planting in the fall all hardy plants is not generally realized until spring—**when it is too late.** Let us urge you, therefore, to plant bulbs and hardy plants now.

Respectfully,

The McGregor Bros. Company.

Select Named Single Hyacinths

Single Hyacinths are much to be preferred to double ones. In double Hyacinths whereas the single florets are doubled, they are much farther apart on the stem, and therefore do not form nearly so handsome a truss as the single varieties, where the trusses are much longer and fuller. We strongly advise the single instead of the double for both bedding and pot culture.

Hyacinth La Victoire

Prepared Fibre for Bulb Growing

This is something new in which to grow and flower bulbs during winter in bowls, jardineres, fern dishes, etc., without drainage. A splendid advantage for townspeople or city people who have difficulty in obtaining good potting soil.

Prepared Fibre is composed of excellent Holland peat, combined with other materials, such as charcoal, crushed oyster shells, etc., to keep it sweet. It does not dry out as quickly as soil nor sour if too much water is given. It is light, clean and nice to handle, and if used as directed will encourage healthy growth and perfection of bloom. By our own testing of this material we have found that the bulbs come into flower two weeks earlier when planted in fibre, and that the flowers are much larger. This is especially true of the four Hyacinths recommended for pot culture on the opposite page. As soon as Hyacinth bud begins to show color bring the pot into a warm, sunny position and give an abundance of water.

An excellent medium in which to grow Hyacinths, Roman Hyacinths, Tulips, Narcissus, Crocus, Chionodoxias, Freesias, Scillas, etc. Full directions sent with every package.

Price, 12 cents per quart, postpaid; 4 quarts for 40 cents, postpaid. By express, 4 quarts for 30 cents; 8 quarts for 50 cents.

Roman Hyacinth

Our named Hyacinths will produce more than one flower spike to the bulb.

ATTRACTIVE Early Tulips

Tulips are of the most satisfactory spring-flowering bulbs. They are extremely hardy and of easy culture, blooming as freely and producing as fine flowers in a confined town garden as in a more favorable place. Double and Single Tulips, when associated together and planted in beds or in front of shrubs, maintain a longer display than if either are separately planted.

Our collection includes the very best varieties, both in the early and late-flowering classes. (The figures indicate height of flower.)

This class is without doubt the Queen of Tulips, very stately and beautiful—producing immense flowers on tall stately stems two to three feet in height. The flowers are models of perfection in form and remain perfect longer than any other Tulip. They are constitutionally so strong that grass will not choke them and will thrive for several years with no attention if planted in grassy places. In color they are both dainty and rich—white, pink, rose and crimson, also mauve, light blue, purple or maroon, all with perfectly marked centers.

If you plant Darwin Tulips once you will never again be without them.

"THE FLOWER THAT SET A NATION MAD"

The Black Tulip "La Tulipe Noire"

The largest amount of money ever offered for the production of a single flower was $100,000, for a perfectly black Tulip, over three hundred years ago, during the Tulip craze in Holland. The romance of its production formed the plot for a noted novel; and it is also responsible for one of the greatest financial panics of the world. The descendants of this famous flower are still very scarce, rare and valuable. We have secured a few bulbs of this historical Tulip and offer you bulbs of the jet black, wonderful large flowered Tulip. There is yet no variety which surpasses this in either beauty or size. **Price, 25 cents each.**

The Darwin and other late Tulips hold their flowers perfect for a month. They are superb.

May-Flowering or Late Garden Tulips

This beautiful class is becoming more popular each season. They are quite distinct from the early flowering sorts. For bedding they are superb, while as cut flowers they are much to be preferred to the early type, having long stems with flowers of great substance that remain in perfect condition for a month, and are much more brilliant in color.

We Have Added Several New Varieties of Hyacinths, Tulips and Narcissus which are extraordinary.

Polyanthus Narcissus

Large-Flowered Paper White Narcissus

If grown in pots, six or seven weeks will produce the flowers. We especially recommend to grow this bulb in a dish filled with water and bulbs well supported with pebbles, after the fashion of Chinese Sacred Lilies, as they are far superior to the latter. Flowers appear in six weeks in greater number and more perfected. Failures are not known. It is advisable to start the bulbs in a dark place for four to six days. Grow cool and give plenty of water.

Large clusters of pure white flowers, which remain perfect for several weeks. Extra size bulbs. **Price, 5 cents each; 45 cents per dozen.**

Double Roman Cluster Narcissus

Outer petals cream white with double orange and yellow cup; very early and free-flowering, and valuable for forcing and pot culture. Also splendid for growing in water and pebblees in same manner as advised for Paper White. **Price, 5 cents each; 40 cents per dozen.**

Chinese Sacred Narcissus

(Oriental Lily or "Joss Flower")

The most satisfactory of all winter-blooming bulbs. No home should be without one. Nothing is easier cared for or gives as great an abundance of deliciously scented bloom. Fill a bowl or similar vessel with pebbles, in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of pebbles, and place in a warm, sunny window. The bulb will at once commence rapid growth and bloom in four or five weeks. **Price, extra size, 12 cents each; 5 for 50 cents; by express, $1.00 per dozen.**

Grand Soleil d'Or

Outer petals rich, golden yellow, cup deep orange-red. Very brilliant. Splendid for outdoor planting as well as for house culture. **Price, 5 cents each; 40 cents per dozen.**

Growing bulbs in Prepared Fibre is an interesting, quick, easy and cleanly method of flowering them in the house in winter. All the above Narcissus are especially good for growing in fibre.

Double Peerless Narcissus

DOUBLE TRUMPET

DOUBLE VON SION—"The True Double Yellow Daffodil." Rich golden-yellow perianth and trumpet. This is the old favorite so highly prized in old-fashioned gardens. Yellow Calla Hastata

White Calla

NEW GODFREY—A wonderful improvement over the old White Calla. The plant is very bushy, having double as many leaves as the old variety and producing three times as many flowers. Flowers are unusually large, held high, and on stiff stems. After the summer growing season the bulbs can be taken up in September, given a slight rest, and will flower through the winter. The same plant will grow and bloom for years, and the quantity of flowers this variety will produce is astonishing. It is estimated that several plants of the old variety will not produce as many blooms in a single season as this more recent introduction. The blooms are of large size and snowy whiteness. **Price, 20 cents each; 3 for 50 cents; 6 for $1.00; extra large bulbs, 40 cents each; 3 for $1.00.**

This superb new race will begin blooming in January if grown in a conservatory. Unsurpassed for pot culture. **Price, 4 cents each; 35 cents per dozen.**

CHOICE DECORATIVE PALMS

Fan Leaved Palm (Lat. Borbonica), 20c, 50c, $1.25.

Fan Leaf Palm

(Latania Borbonica.)—This is the typical Palm and is more largely grown than all other varieties combined (possibly excepting the Kentias). Its vigorous, healthy habit and large, glossy green, fan-like leaves commend it to all. Nothing is more satisfactory as a decorative plant than a well-grown specimen of Latania. This is the Palm from which the Chinese Palm Fans are made. Adapted to all decorative purposes within or without doors. **Price, nice young plants, 20 cents each; larger plants, 50 cents each; large specimen plants, $1.25, by express.**

Ostrich Plume Palm 60c, $1.25 and $2.50.

Phoenix Roebelini

(The Ostrich Plume Palm.)—This beautiful Palm has the grace and lightness of Cocos Waddelliana, but is more robust in growth, foliage gracefully curved, spreading in habit. It will be the most popular for house decoration. Has graceful curving leaves with very narrow dark green pinnae, giving it a lightness and airiness not surpassed. At the same time it is as hardy as the Kentia Palm, succeeding admirably as a house plant. **Nice young plants, 60 cents; larger plants, $1.25; extra large plants, $2.50, by express only.**

Notice

It may be well to state here that young Palms do not resemble the illustrations given, as they do not show their character leaves until the second and third year, so that when you order small Palms and see long, narrow leaves instead of the character leaves, as shown in the illustration, do not think that the wrong kind has been sent you.

Kentia Belmoreana

One of the best in its class; graceful, hardy, bright green, foliage gracefully disposed. **Price, nice plants, 40 cents each, postpaid; larger size plants, specimens, 60 cents; extra large plants, $1.50 (by express only).**

Areca Lutescens

Areca Lutescens

One of the most beautiful Palms. Its dark, glossy green leaves are gracefully curved on slender stems, and the entire foliage is gracefully disposed; the trunk and stems are golden yellow. **Price, nice plants, 35 cents, postpaid; larger plants, 75 cents.**

Kentia Fosteriana

One of the finest pot plants of any of the Palm family. Leaves deep, glossy green, fan-shaped, split deeply into segments. Very similar to Kentia Belmoreana, but with broader foliage. **Price, nice plants, 40 cents, postpaid; larger plants, 60 cents and $1.50 each (by express only).**

Cocos Palm

(Cocos Weddelliana.) — The most elegant and graceful of all the smaller Palms. Its slender stem is freely furnished with graceful and arching leaves of a glossy green color. The smaller sizes are admirable for Fern dishes. Larger sizes make up some of the best specimens of the Palm family. **Price, 40 cents each, by express.**

Kentia Belmoreana, 40c, 60c and $1.50.

Mrs. B. S., Waynesboro, Pa., "Just received Palms, and they were in good condition."

India Rubber Plant

(Ficus Elastica)

Ficus Elastica, better known all over the country as the Rubber Plant, is undoubtedly one of the most popular and satisfactory house plants that has ever been distributed. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Branched plants are produced by simply cutting out the top, which should be done in the early spring. The Rubber Plant does not require more than what might be termed good garden soil. Its wonderful thick, leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a showy appearance. It is particularly adapted to house culture and for porch decoration. **40c. Larger plants by express, 50c and 75c.**

Ficus Elastica—Rubber Plant, 40c, 50c, 75c

Cycas Revoluta

Sago, or Japanese Fern Palm

For years the price of the Sago Palm has placed it beyond the reach of ordinary plant buyers. We have imported a fine lot of Cycas from Japan and offer them very low so as to be within the reach of all.

It is probably the most valuable decorative Palm grown, both for lawn and house decoration. The heavy, glossy, deep green fronds resist alike the gas, dust and changes of temperature to which house plants are frequently exposed. Must be sent by express, too large to mail. **Price, nice, small, shapely plants, 75 cents; 6 to 8 leaves, $1.00 each; 8 to 10 leaves, $1.50; 10 to 12 leaves, $2.00.**

Bulbs increase in size each year and the leaves double in size and number. Sent by express only.

Sago, or Japanese Fern Palm

Dracena Terminalis

A superb species, with rich, crimson foliage, so marked with carmine-pink and creamy-white that words cannot describe the exquisite coloring. It is a rapid grower, and for room adornment or as a vase plant for outdoor use it is indispensable. **Price, fine plants, 25 cents each; larger plants, 50 cents.**

Dracena Terminalis, 25c, 50c

Dracena Indivisa

A very beautiful house or garden plant, with slender, drooping leaves, often called a "Fountain Plant." The leaves are of several shades of green, with delicate stripings of yellow and red, which become marked as the plant grows older. **Price, 10 cents each; larger plants, 25 cents.**

Russelia Elegantissima

Especially adapted for hanging baskets, vases or window boxes. The plant is literally covered with brilliant coral-red florets. Well grown plants, 3 to 4 feet in diameter, look like a shower of delicate coral blossoms. **Price, 10 cents each; three for 25 cents.**

Grevillea Robusta

Or the Australian Silk Tree.

A magnificent plant for decorative purposes, of rapid, easy growth, finely cut foliage, rivaling a rare Fern. The young growing leaves are light brown color, the tips being covered with a soft down, closely resembling raw silk, hence the name, "Silk Oak." **Price, nice plants, 15 cents each; three for 40 cents; $1.25 per dozen.**

Araucaria Excelsa—Norfolk Island Pine, $1.00, $1.25

Norfolk Island Pine

(Auracaria Excelsa)

As a decorative plant for the house this is one of the handsomest and most serviceable. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage is unequaled. Easily grown and highly ornamental. We offer fine selected stock, especially in the medium size, for which there is always demand. The plants withstand drought and neglect to an unusual extent. The soil in the pot from top to bottom should be kept evenly moist, but not continually soggy. During the heat of the summer, to keep up the proper growth, the plants should be kept in practically total shade and syringed constantly and not allowed to dry out for any great length of time. **Price, nice plants, 12 to 15 inches high, 3 tiers, $1.00 each; larger plants, 15 to 20 inches high, $1.25.**

Dracena Indivisa, 10c, 25c

Pelargonium Easter Greeting

This new, everblooming Pelargonium was shown at Mannheim Horticultural Show, planted out as a bedding plant, and bloomed continually until late in the fall. Rivals the Azalea in beauty. The following description is from the German introducer, Carl Fraiss: "Easter Greeting is the most wonderful flowering variety of all Pelargoniums. Its blooming season extends from late winter to early fall, and through the summer the plants are gorgeous. The plants in 5-inch pots have produced over a hundred trusses of blooms. The variety is of strong, compact, bushy habit, holding its foliage well. The color is hard to describe—a fiery, amaranth-red. Some describe it as a brilliant rose. Each of the five petals is marked with a large dark brown or black spot in the center, the spot being bordered with scarlet, daintily penciled with crimson. The combination is very striking and at once catches the eye of the most careless observer. The florets are very large, from 2¼ to 3¼ inches in diameter, and are very durable either on the plant or when cut." **Price, 25 cents each, 3 for 65 cents; 6 for $1.20; $2.25 per dozen.**

Giant Primroses

The greatly improved forms of present day Primroses bear little resemblance to the dull colored flowers of a few years ago. Not only have the flowers become greatly enlarged but the species offer a much greater range of colors—from white through all shades of rose and pink to a beautiful rich crimson, together with flowers of most striking yellow. There are many species and varieties, the best of which is perhaps the Obconica class. The new Hybrid yellow variety is found in Kewensis, a dwarf, unique sort, and representing the freest flowering of all Primroses. All classes of Primroses are literally perpetual flowering and the sprays are invaluable for cutting.

Primula Kewensis

This Hybrid first appeared in the Royal Gardens at Kew as a chance seedling in a batch of P. Floribunda, but notwithstanding its adventitious origin it is none the less welcome and valuable, as it combines the free-flowering habit of P. Floribunda with the larger and richer yellow flowers of P. Verticillata. It is almost as perpetual flowering as P. Obconica, and is particularly desirable for indoor decoration in the winter, because it supplies just that color that is wanting in the forms of P. Sinensis. **Price, 20 cents each; 3 for 50 cents; $1.75 per dozen.**

McGregor's Giant-Flowering Chinese Primroses

There are many species and varieties of Primulas, all of them charming, free-flowering plants, and most of them extensively cultivated. Perhaps the prettiest, as also the best known type, is the Chinese Primrose, one of the best house plants in existence. All of its numerous varieties furnish beautiful material for pot culture and most tractable and reliable plants for indoor treatment. The same may be said of Primula Obconica, a variety of later introduction. Its heads of finely formed flowers, ranging in color from the purest white to deepest carmine, are produced in great numbers and from the easiest of culture. Another superb variety for the house is Primula Forbesii or the Baby Primrose, a very dwarf, unique sort, but the freest flowering of all Primulas, sending up countless tiny flower spikes all through the winter months. All the varieties named above are not hardy, and are chiefly grown in and for the conservatory, greenhouse and dwelling room.

Cyclamen

The Cyclamen Persicum, or Persian Violet, is one of our prettiest winter-blooming plants, and one which is worthy of considerable attention by every flower grower. It grows rapidly, blossoms freely, and remains a long time in flower. A cool temperature and a moist condition of the soil are the two conditions which must be kept up. When the plant has ceased flowering withhold the water some, keeping them in a cool, shady place out of doors, thus causing the bulbs to assume a dormant state, in which they should be held until time for repotting and starting in the fall. **Price, 20 cents each; larger size, 35 cents. Three separate colors for 50 cents.**

A Rose that has met with universal appreciation by both the amateur and professional grower. The color is one very hard to describe, being a shade of brillant clear rose or brght peach-pink.
